

Diaphragm Valve, Metal

with integrated automation module

Construction

The GEMÜ 651 piston actuated 2/2-way diaphragm valve is designed for use in sterile applications and has a fully integrated automation module. Normally closed and Normally open control functions are available.

The automation module is available in two versions. Either as a **combi switchbox** with integrated 3/2-way pilot valve for valve actuation and position feedback or with an integrated **electro-pneumatic positioner**. GEMÜ 651 has a microprocessor controlled, intelligent position sensor as well as an integrated analogue travel sensor system. The **Speed-AP** function simplifies commissioning. The base of the actuator housing is made of stainless steel, the cover is made of a stable transparent plastic material.

Features

- Suitable for inert and corrosive* liquid and gaseous media
- Compact design (ideal when space is at a premium)
- CIP cleaning capability
- **Integrated automation module as either**
 - **combi switchbox** or
 - **electro-pneumatic positioner**
- Integrated travel and system control
- AS-Interface field bus connection (option for combi switchbox)

Advantages

- Reduced planning and cabling time
- Integrated air ports
- **Speed-AP** function for fast commissioning
- Optional flow direction
- Installation for an optimized draining is possible
- M5 control air connectors, available in-line with piping or rotated by 90°

*see information on working medium on page 2

Sectional drawing

Technical data

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

The valve will seal in both flow directions up to full operating pressure (gauge pressure).

Temperatures

Medium temperature	-10 ... 100 °C
Ambient temperature	
Actuator size 0/1	0 ... +60 °C
Actuator size 2	0 ... +50 °C
Max. permissible temperature of control medium	
Actuator size 0/1	60 °C
Actuator size 2	50 °C
Flow rate of pilot valve (at 6 bar)	
Actuator size 0/1	15 l/min
Actuator size 2	100 l/min
Sterilisation temperature ⁽¹⁾	
EPDM (Code 13/3A)	max. 150 °C ⁽²⁾ , max. 60 min per cycle
EPDM (Code 17)	max. 150 °C ⁽²⁾ , max. 180 min per cycle
PTFE/EPDM (Code 54)	max. 150 °C ⁽²⁾ , no time limit per cycle
PTFE/EPDM (Code 5M)	max. 150 °C ⁽²⁾ , no time limit per cycle

¹ The sterilisation temperature is valid for steam (saturated steam) or superheated water.

² If the sterilisation temperatures listed above are applied to the EPDM diaphragms for longer periods of time, the service life of the diaphragms will be reduced. In these cases, maintenance cycles must be adapted accordingly. This also applies to PTFE diaphragms exposed to high temperature fluctuations.

PTFE diaphragms can also be used as moisture barriers; however, this will reduce their service life.

The maintenance cycles must be adapted accordingly.

GEMÜ 555 and 505 globe valves are particularly suitable for use in the area of steam generation and distribution.

The following valve arrangement for interfaces between steam pipes and process pipes has proven itself over time:

A globe valve for shutting off steam pipes and a diaphragm valve as an interface to the process pipes.

Control medium

Quality classes to DIN ISO 8573-1

Actuator size 0/1	
Dust content	Class 3 (max. particle size 5 µm), (max. particle density 5 mg/m ³)
Pressure dew point	Class 3 (max. pressure dew point -20 °C)
Oil concentration	Class 3 (max. oil concentration 1 mg/m ³)
Actuator size 2	
Dust content	Class 3 (max. particle size 5 µm), (max. particle density 5 mg/m ³)
Pressure dew point	Class 4 (max. pressure dew point 3 °C)
Oil concentration	Class 5 (max. oil concentration 25 mg/m ³)

Filling volume

Actuator size 0:	0.028 dm ³
Actuator size 1:	0.071 dm ³
Actuator size 2:	0.239 dm ³

Materials

Actuator housing	Cover: PP Base: 1.4408
------------------	---------------------------

Technical data

General information

Protection class	IP 65 / IP 67*
Electrical protection class	III
Mounting position	Optional
Directives	
EMC directive	2004/108/EG
Interference resistance	EN61000-6-2
Interference emission Automation module B2	EN61000-6-4 (class B)
Interference emission Automation module F0/F1	EN61000-6-4 (class A)
Low voltage directive	2006/95/EG

* IP 67 is achieved by piping away the exhausting air. Replace threaded exhaust air plugs by M5 adapter (1434 000 Z2) for this purpose.

		Operating pressure		Control pressure		Actuator weight
Diaphragm size	DN	EPDM	PTFE	C.f. 1	C.f. 2	[g]
8	4 ... 15	0 - 10 bar	0 - 6 bar	3.5 - 7 bar	max. 4.5 bar	1000
10	10 ... 15	0 - 10 bar	0 - 6 bar	4.5 - 7 bar	max. 4.5 bar	1500
25	15 ... 25	0 - 10 bar	0 - 6 bar	5.0 - 7 bar	max. 4.5 bar	3800

All pressures are gauge pressures. Operating pressure values were determined with static operating pressure applied on one side of a closed valve. Sealing at the valve seat and atmospheric sealing is ensured for the given values. Information on operating pressures applied on both sides and for high purity media on request.

Kv values [m³/h]

MG = diaphragm size
 Kv values determined acc. to DIN EN 60534, inlet pressure 5 bar, Δp 1 bar, stainless steel valve body (forged body) and soft elastomer diaphragm. The Kv values for other product configurations (e.g. other diaphragm or body materials) may differ. In general, all diaphragms are subject to the influences of pressure, temperature, the process and their tightening torques. Therefore the Kv values may exceed the tolerance limits of the standard.

The Kv value curve (Kv value dependent on valve stroke) can vary depending on the diaphragm material and duration of use.

Ra ≤ 0.80 μm	H3	1502
Ra ≤ 0.60 μm ⁵	-	1507

¹ Surface finishes of customized valve bodies may be limited in special cases.

² Or any other finishing method that meets the Ra value (acc. to ASME BPE).

³ The smallest possible Ra finish for pipe connections with an internal pipe diameter < 6 mm is 0.38 μm.

⁴ When using these surfaces, the bodies are marked according to the specifications of ASME BPE.

The surfaces are only available for valve bodies which are made of materials (e.g. GEMÜ material codes 40, 41, F4, 44) and use connections (e.g. GEMÜ connection codes 59, 80, 88) according to ASME BPE.

⁵ Not possible for GEMÜ connection code 59, DN 8 and GEMÜ connection code 0, DN 4.

Ra acc. to DIN EN ISO 4288 and ASME B46.1
