

## Diaphragm Valve, Metal

### Construction

The GEMÜ 653 / 654 manually operated 2/2-way metal diaphragm valve has a stainless steel bonnet and is available in two versions - GEMÜ 653 has a handwheel in high temperature and chemically resistant plastic, GEMÜ 654 a stainless steel handwheel. The handwheel is non-rising (except diaphragm size 8) and has a standard optical position indicator. The valve is available with two bonnet versions: Design D has concealed bolt mounting in the bonnet and is only suitable for 2/2-way bodies. Design T is suitable for T valve, Multi-port valve, Tank bottom valve and 2/2-way valve bodies.

### Features

- Suitable for inert, corrosive\*, liquid and gaseous media
- CIP/SIP cleaning and sterilizing capabilities
- Autoclave capability
- Insensitive to particulate media
- Surface finishes down to 0.25 µm, electropolished
- Designed according to GMP (Good Manufacturing Practice)

### Advantages

- The handwheel design allows minimal heat sink thus reducing the danger of burns injuries
- The service life of the diaphragm is increased to a maximum by the patented optional seal adjuster (US-patent 6,691,737 B2)
- Optional flow direction
- Installation for an optimized draining is possible
- Option
  - Lockable handwheel
  - Mounting for proximity switches for position feedback

\*see information on working medium on page 2

Bonnet version "D"

## Technical data

### Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

The valve will seal in both flow directions up to full operating pressure (All pressures are gauge pressures).

### Temperatures

#### Media temperature

FKM (Code 4/4A)	-10 ... 90 °C
EPDM (Code 13/3A)	-10 ... 100 °C
EPDM (Code 17)	-10 ... 100 °C
PTFE/EPDM (Code 54)	-10 ... 100 °C
PTFE/EPDM (Code 5M)	-10 ... 100 °C

#### Sterilisation temperature <sup>(1)</sup>

FKM (Code 4/4A)	not applicable
EPDM (Code 13/3A)	max. 150 °C <sup>(2)</sup> , max. 60 min per cycle
EPDM (Code 17)	max. 150 °C <sup>(2)</sup> , max. 180 min per cycle
PTFE/EPDM (Code 54)	max. 150 °C <sup>(2)</sup> , no time limit per cycle
PTFE/EPDM (Code 5M)	max. 150 °C <sup>(2)</sup> , no time limit per cycle

<sup>1</sup> The sterilisation temperature is valid for steam (saturated steam) or superheated water.

<sup>2</sup> If the sterilisation temperatures listed above are applied to the EPDM diaphragms for longer periods of time, the service life of the diaphragms will be reduced. In these cases, maintenance cycles must be adapted accordingly. This also applies to PTFE diaphragms exposed to high temperature fluctuations.

PTFE diaphragms can also be used as moisture barriers; however, this will reduce their service life. The maintenance cycles must be adapted accordingly.

GEMÜ 555 and 505 globe valves are particularly suitable for use in the area of steam generation and distribution.

The following valve arrangement for interfaces between steam pipes and process pipes has proven itself over time: A globe valve for shutting off steam pipes and a diaphragm valve as an interface to the process pipes.

#### Ambient temperature

Standard	0 ... 60 °C
Accessory MAG	0 ... 35 °C

Temperature at mounting point for proximity switches see ambient temperature diagram below

### Bonnet material

Bonnet	A4 stainless steel
Cap (DN 10 - DN 40)	PEEK
Cap (DN 50 - DN 100)	PES
653 handwheel	PPS glass filled
654 handwheel	A4 Edelstahl

### Operating pressure [bar]

Diaphragm size	Nominal size	EPDM / FKM		PTFE		
		Diaphragm material	All valve body materials	Diaphragm material	Forged body*	Investment cast body
8	DN 4 - 15	3A, 4A, 17	0 - 10	54	0 - 10	0 - 6
10	DN 10 - 20	4, 13, 17	0 - 10	54	0 - 10	0 - 6
25	DN 15 - 25	4, 13, 17	0 - 10	5M	0 - 10	0 - 6
40	DN 32 - 40	4, 13, 17	0 - 10	5M	0 - 10	0 - 6
50	DN 50 - 65	4, 13, 17	0 - 10	5M	0 - 10	0 - 6
80	DN 65 - 80	4, 13, 17	0 - 10	5M	0 - 10	0 - 6
100	DN 100	4, 13, 17	0 - 10	54	0 - 10	0 - 6

All pressures are gauge pressures. Operating pressure values were determined with static operating pressure applied on one side of a closed valve. Sealing at the valve seat and atmospheric sealing is ensured for the given values. Information on operating pressures applied on both sides and for high purity media on request.

\* With bonnet versions T and X. Bonnet version D: 0 - 6 bar

MG = diaphragm size

Kv values determined acc. to DIN EN 60534, inlet pressure 5 bar,  $\Delta p$  1 bar, stainless steel valve body (forged body) and soft elastomer diaphragm. The Kv values for other product configurations (e.g. other diaphragm or body materials) may differ. In general, all diaphragms are subject to the influences of pressure, temperature, the process and their tightening torques. Therefore the Kv values may exceed the tolerance limits of the standard.

The Kv value curve (Kv value dependent on valve stroke) can vary depending on the diaphragm material and duration of use.

## Special versions

**Additional function A**  
with seal adjuster, stroke limiter  
and mounting for proximity switches M 8x1

**Additional function E**  
with seal adjuster, stroke limiter  
and safety gland packing

## Additional function B, K, F

### Types of locking devices

<p style="text-align: center;"><b>B</b></p>	<p><b>B</b> Mounting of locking device (both directions), proximity switch possible</p>
<p style="text-align: center;"><b>K</b></p>	<p><b>K</b> Mounting of locking device to prevent opening, proximity switch possible</p>
<p style="text-align: center;"><b>F</b></p>	<p><b>F</b> Mounting of locking device to prevent closing, proximity switch possible</p>

## Type of accessory

### MAG - Electrical locking device

### LOC - Mechanical locking device

The solenoids, padlocks etc. for the "locking device" must be ordered separately as accessories.  
Available only in connection with the bonnet additional functions B, K, F!

Order example	653	MAG	VE1	C1
Type	653			
Type of accessory		MAG		
Kit			VE1	
Voltage/Frequency (code)				C1

Type of accessory	<b>MAG</b>	- Electrical locking device
Kit	VE1	- Normally closed (locking device active)
Kit	VE2	- Normally open (locking device inactive)
Voltage/Frequency	C1	- 24 V DC

Type of accessory	<b>LOC</b>	- Mechanical locking device
Kit	VMB	- without padlock
Kit	VML	- with padlock

Special function		
ATEX	X
